Once a foreigner becomes an American citizen, he is recognized as such by the authorities of his adopted country the world over, and can claim and depend upon receiving the same protection as an American citizen as if he had been born upon American soil. This is just as it should be, and a citizen as if he had been born upon American soil. This is just as it should be, and a citizen as if he had been born upon American soil. This is just as it should be, and a citizen as if he had been born upon American soil. This is just as it should be, and a citizen ship that does not extend that far, is certainly not worth seeking for or accepting. It has often been a matter of surprise to Canadan people why, of the thousands who annually emigrate from Germany and other European States to America, so few comparatively acttle in the British Provinces, compared with the vast numbers that become residents of the United States. It is not because the climate is more genial or the soil better; it is not because the laws are so much more liberal in the one country than in the other, or that life and property are any more secure; nor is it because labor receives a higher rate of remuneration, or the farmer a better price for the produce of the soil, or that the burden of taxatton is less, in the United States than in Canada. Have received instructions from Mr. T. Williamson, to sell on the premises Kane St. near Blanchard, AT 11 O'CLOCK A. M. Wednesday, May 14,1873 HOUSEHOLD FURNITURE, Contained in Parlor, Bed Rooms, Sitting & Dining that the burden of taxation is less, in the United States than in Canada. Themhow happens it that fully three-fourths or more of all the vast stream of humanity that every Rooms. year flows toward the American continent from Europe settles down in American terri-KITCHEN FURNITURE, tory in preference to the Dominion of Cannada? There are doubtless various causes for this. One has beretofore been Oil Cloth, Glassware, a better system of emigration agency established throughout the various centres of European population; another is the influence exerted by friends, who have settled in the States, over their relatives in the old world who have made up their minds to emigrate; but there can be no doubt the more Beds & Baby Carriage, Beds & Bedding, perfect system of naturalization in the United States has had much to do with the preference given by foreigners to the United States over Canada as a country in which to permanently settle. As we have already observed, when a man takes the oath of al-A fine lot of Laying Hens, mys J.P. DAVIES & CO., Auctioneers legiance to the United States and becomes a citizen, go where he will the United States recognizes his citizenship and will defend it at all hazards; but not so in Canada. Canaat all hazards; but not so in Canada. Canadian naturalization is little better than a delusion and a snare. It gives a man only the shadow of citizenship, not the substance. An immigrant from Germany, France or other foreign country arrives in Quebec, Ontario, or either of the other provinces of the Dominion, there settles down and in due concrete of time takes the eath of alleriance to Cows and Calves the Dominion, there settles down and in due course of time takes the oath of allegiance to her Majesty the Queen, her heirs and successors, and becomes, as he supposes, a British subject. By that act he forleits his rights as a subject of the country from which he came, and what has he gained by it? He has simply acquired certain political rights in the particular Province wherein he has become a citizen; but the moment he crosses beyond its borders into any other Province, or into the United States or other foreign country, he forfeits his citizenship, and to all intents and surposes becomes an outcast upon society and purposes becomes an outcast upon society entirely destitute of any nationality that he can call his own or any flag under which to take shelter in time of need. In view of such a state of affairs, is it any wonder that foreigners shrink from becoming the citizens of a country that guarantees them not the slightest protection the moment they pass beyond the limits of the particular Province wherein they reside? Such a system is an insult to common sense, and so foreigners Olds. P. DAVIES & CO. insult to common sense, and so foreigners view it. We are glad to see that the matter Have received instructions from view it. We are glad to see that the matter has been brought up in the House of Commons at Ottawa, and in such a way as we trest may lead to a change in our naturalization laws more in harmony with the spirit and progress of the times and better adapted to the wants and circumstances of our country. On the 10th ultimo, Mr. Young, member for Waterloo, moved the House into Committee of the Whole to consider certain resolutions for an address to the Maiesty, setting forth the disadvantages. Wm. BAINES, Esq., TO SELL BY Her Majesty, setting forth the disadvantages under which naturalized Germans suffer, and praying that steps may be taken for the redress of the same by the negotiation of a naturalization treaty between Great Britain and the German States. He said that the resolution was similar to the one which he had introduced last year. The great importance of the resolution itself, as well as the great interest taken in it by a great number of his constituents who were Germans. the great interest taken in it by a great number of his constituents who were Germans, had induced him again to bring it under the consideration of the House. It might not be generally known to the House that foreigners naturalized in this country ceased to be British subjects, whenever they overstepped the boundaries of the particular colony in which heir naturalization had taken place, and lost all of their rights as subjects. In many cases Germans who had desired to revisit their homes in Europe were deterred, because they feared to be called upon to do military service an German subjects. It was, therefore, evident that Germans could not be satisfied with the position which they held here. The with the position which they held here. To cross the border the immigrants became United States subjects, and remained so no matter where they might go. If, however, they came to Canada, they became British subjects only for so long as they remained in Canada. In 1870, the Imperial Parliament had passed a law, one of the provisions of which was that any alien who under the laws of his native country ceased to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would to have a subject on leaving his country would have a subject on leaving his country w my8 J. Another provision of the law was that any naturalized alien would be recognized as a British subject with whose native country a naturalization treaty existed. He therefore moved for an address, to be laid at the foot of the Throne, praying Her Majesty to be pleased to take steps for the negotiation of a treaty with the German States, such as would put us in an equal position with the United States. JOHN ASH, Provincial Secretary

cretary of State for the Provinces to His Exenant-Governor of British

the cordial expression of gratification at my appointment to the Government of the Dominion, conveyed to me in your Address, I desire to assure you of the sincere pleasure it affords me to witness the proofs of the devoted loyalty to the Throne which are conspicuous throughout the Dominion, no less on the abores of the Pacific than on those of the Atlantic

Atlantic.

I trust that I may, at no distant time, have an opportunity of visiting British Columbia and making myself better acquainted with a portion of the Dominion, soon I hope to be brought in closer connection with the Eastern

Provinces.

In the meanwhile I shall watch with deep interest the effect of all measures tending to the development of its resources, feeling adre that your earnest attention will be given to whatever may conduce to render the future of the vast country West of the Rocky Mountains commensurate with the hopes that are entertained regarding it. You may rest assured that no effort will be spared on my part to further as far as lies in my power the moral and material prosperity of the Dominion, and my hopes of success are escouraged by feeling myself united in these labours with sminent persons, like yourselves, who are develing their best talents and energies to so noble an oject.

New York, May 5-A fetter from Montres states that a bitter war, increasing in vio ence, is being waged between the Liberal Carbolics and the Ultramontines of Canada; the former are under the lead of the Archbishop of Quebec, and the latter of the Jesuit Archbishop of Montreal. In the last election the Quebec party increased their de-legation to Parliament from 15 to 28. The representatives of the Montreal coalition shrank from 50 to 32, insuring the control of Parliament. The Jesuit party sought to sub-Quebec and to destroy his influence, hoping thereby to gain power. The Archbishop visited them and has returned, which will Const visited them and has returned, which will Const.

and floot and Shoe Manufacturing, and of continuing the same.

The purchase would include the Land, Buildings, Mackinery, Plant, Stock-in-Trade and goodwill of the basiness, all of which it is proposed shall be taken at valuation to be made by competent disintervated persons.

The Boot and Shoe Department has for the past two years been carried on under the management of Mr. Switzer, almost exclusively by Chinese labor, at a small cost, but the recent addition of the Tanuery, which was found a necessity, in order to maintain a sufficient supply of good material, has required a considerable outlay, and renders the introduction of further capital necessary for the proper development of the business.

The Factory is well arranged, and is fitted with the most approved Machinery.

The Tannery has every appliance for the saving of abor. abor.

The Water Power which is utilized for the conduct of Works, is all that could be desired, and could readily be increased to ten times its present power, if at any time required, either for the purposes of this undertaking, or for any other Manufactory. The supply is derived from Springs on the Estate, is very soft in quality, and is never failing.

The Tamery operations only commenced in August Magnet of the undertaking.

The supply is derived from Springs on the Estate, is very soft in quality, and is never failing.

In fact the business is in thorough working order, and Mr. Switzer's services as Manager of the Works will be retained upon terns favorable to the Company.

The Land consists of \$16 acres, known as the Spring Vale Estate, some of which is of excellent chality.

The Timber is of considerable value for Firewood, the situation being favorable for easy delivery.

The operations of the Boot and Shoe Manufactory during the past two years have been highly satisfactory.

The goods are specially adapted to the requirements of the Provincial trade, have given general satisfaction, and at a profit successfully compete with the imported article.

The sales for 1872 amounted to nearly \$30,000, which, considering the short time the enterprise had been in operation, shows the favor with which the producets have been received.

C. BOOTH, ESQ., of Kootenay, to be Corone for the Electoral District of Yale.

C. BOOTH, ESQ., of Kootenay, to be Corone for the Electoral District of Kootenay.

By Command.

JOHN ASH,

Provincial Secretary.

The Tannery approximation of Boots and Shoes as declared at the Custom House for the year 1871, was about \$100,000, representing a selling value, after adding duties, etc., of say \$150,000. The importation for last year fell off considerably, the decrease being doubtless partially occasioned by the local production. In addition to the demand for Boots and Shoes, as evidenced by the Customs House returns, the sales of Leather produced at the Tannery have to be taken into account, when considering the entire field for the operations of the undertaking.

The Tannery operations only commenced in August

ing the entire field for the operations of the undertaking.

The Tannery operations only commenced in August last, and as the tanning process involves a period of several months, the business of this Pepartment is in its infancy—a very superior article is, however, being produced at low prices by an economical process, and, as there is no difficulty in obtaining an abundant supply of Hides, the outturn will be sufficient for the supply of Hides, the outturn will be sufficient for the supply of the general demand for harmes, mill belting, ac, in addition to the requirements of the Boot Factory was the first enterprise of its kind established in the Province, and its having been so far carried on with success is an assurance that, as population increases, very remunerative returns will be realised.

The value of industrial institutions to the well being of any country is indisputable, and as the hides produced in the Province are now being manufactured into leather, which in turn is made into Boots and Shoes, &c., (instead of as formerly being exported and the manufactured articles in turn imported,) the saving to the country by the undertaking is sufficiently obvious. It is, therefore, not unreasonable to assume that the advantages which the prosecution of such a reproductive institution insures will, aside from the remunerative character of the business, have due weight wift all who are in any way interested in the prosperity of the Province.

It should be remarked that this company will become rince.

It should be remarked that this company will become at once possessed of two businesses with established connections, without any interruption to working o lose of time in transfer, and will therefore have from the contract of the

which is capable not only of immediate, but, in the future, almost unlimited extension.

Most similar undertakings of any magnitude are now worked successfully by joint stock companies, both in Great Britain and in the United States.

The transfer of the property to the Company will only be made upon terms satisfactory to the Provisional Board of Directors, based upon the valuation. The purchase will be effected to a large extent in shares retained by the present proprietor, a portion of which will not participate in any profit until a dividend of 10 per cent. has first been paid to the new shareholders.

Applications for shares may be made to the Secretary protess, the Bank of British Columbia, or to Mossy.
